GIANTS GIVE ATHLETICS CLOSE RUN, BUT LOSE GAME

Third Victory for the Philadelphia Boys In the World's Series

BIG PUMP FOR THE MERGER ORDERED WITH A CAPACITY OF 200,000 GALLONS

Owing to the flooding of the winze in the Merger, Manager Kirchen has cut down shipments from that property to fifty tons daily, or enough to meet running expenses. Steps have been taken to handle the water on a scale that gives promise of overcoming the difficulty for all time.

Last Tuesday Mr. Kirchen bought a quintuple duplex pump with a capacity of 200,000 gallons daily, to be delivered in the next ninety days.

It is not settled yet whether this pump will be placed on the Victor or Merger, but as there is ample time to determine this question before the arrival of the machinery, the management is satisfied the question will be easily solved. The Victor shaft is down to the 900-foot level of the Merger, or at a depth of 865 feet vertically, and is sinking at the rate of four and a half feet a day. This would place the Victor down below the 1300-foot mark by the time the pump arrives. If the Victor at that depth is found to drain the Merger, the pump will be placed there, but if the water in the Merger shows no signs of abatement, the pump will be installed on that property.

A double-drum electric hoist, capable of sinking 2500 feet, was delivered to the Victor yesterday, and will be installed immediately. A motor of 150 kilowatts will arrive in ten weeks.

Contract for Big Leaching Plant To Be Built At Luning

Luning is to have a thousand-ton leaching plant reckoned on the daily capacity for treating ores. The first 100-ton unit will be built at once, and this will be followed by the other units as fast as the material can be assembled. The mill will treat custom ores.

The Field process will be used. This has been tested in Montana, at Butte and Phillipsburg, and is said to be highly successful in extracting gold, silver and copper values.

This is the first great development of the merits of Luning as a copper producing camp, although shipments have been made from that district for the last eight years. During the 1906 boom the Groux syndicate of Ely took up over fifty claims in the vicinity of Luning Station and patented the ground. Nothing more was done in the way of development, but others were busy, and they are now going to reap the reward which they think they see not far ahead.

Information of the awarding of the contract was brought to Tonopah this morning by E. K. Bradford, mining engineer of San Francisco, whose name has been connected with some of the largest undertakings in this country and Mexico. The Wagner Azurite Copper company is the one that has placed the contract through Frank Everett, who organized and managed the Wagner Azurite company ever since its incorporation.

The company owns eleven claims at Luning, three groups of claims near Cuprite and seven claims north of Goldyke. At the Luning property there is a showing of 2 1/2 to 6 per cent copper in the shaft, which is in the footwall at a depth of 100 feet. A cross-cut on the 50-foot level enters an ore body 40 feet wide that samples as high as \$1280. Three feet of the ledge runs \$32 in gold, silver and copper. The ledge was struck in the hanging wall and they are drifting both ways in a fine face of ore. The main base is a contact of granite and

lime, with the ore between. On the surface Manager Everett has started three glory holes, where he has a good showing of copper.

The contract for the leaching plant was drawn up with John B. Fields, manager of the Royal Basin Copper company, which has a plant treating 118 tons daily at the Butte-Duluth at Butte. The terms call for operation of the plant in 120 days. All materials, such as rock breakers, boilers, engines and tanks, have also been ordered. Steam will be used at the outset, but it is expected that before spring the company will be able to secure electric connections, since it is expected the plant will call for 1000 horsepower.

Manager Everett has sunk a well down on the flat, where he has twenty feet of good water, but he will sink this lower and install a force pump that will send a stream through a mile ditch to the mine. Men are now digging the ditch.

ordered. Steam will be used at the outset, but it is expected that before spring the company will be able to secure electric connections, since it is expected the plant will call for 1000 horsepower.

CANAL IS VIRTUALLY OPENED

GAMBOIA DIKE BLOWN OUT BY SPARK SET LOOSE BY PRESIDENT

(By Associated Press.)
PANAMA, C. Z., Oct. 10.—The Gamboia dike was blown out at two minutes past 2 o'clock this afternoon.

WASHINGTON, Oct. 10.—A little spark, originating when the president pressed a button in the White House, sped more than 4000 miles over land and under water, and ignited the immense charges of dynamite that virtually cleared the canal by blowing up Gamboia dike. The Western Union, Central and South American Telegraph companies made elaborate preparations from Washington to Galveston, where the spark was repeated to the cable in the Gulf of Mexico to Coatzacoalcas, Mexico, thence over land from Tehuantepec to Salina Cruz, and then by cable to San Juan del Sur, Nicaragua, where it was relayed by another cable to Panama and thence overland to Gamboia.

The Atlantic and Pacific are not actually united by the destruction of the dike, although the explosion removed the last obstruction in the greater part of the canal, and dredges must deepen each line. All locks will be working before ocean-to-ocean navigation is possible.

Nearly every little city and hamlet on the Pacific coast observed the destruction of Gamboia dike today at 2 o'clock, Washington time, where the president pressed the button. Whistles shrieked, and in some places street cars stopped. Commercial organizations and schools also observed the day.

FUNERAL OF SON OF W. L. DAOUST TODAY

The funeral of little Donald Ramsey Daoust, the 4-year-old son of W. L. Daoust of the West End machinist force, took place this afternoon from the residence of the parents on McQuillan street. Rev. J. M. Swander conducted services at the house and also said the last rites over the remains as they were lowered in the grave of the Masonic cemetery. The lad is survived by three brothers and two sisters.

IMMODESTY IN NEW SKIRTS IS CONDEMNED

WOMAN'S CLUBS TO TAKE STEPS TO SECURE ADOPTION OF REFORMS

(By Associated Press.)
WASHINGTON, Oct. 10.—Condemnation of the split skirt, diaphanous gowns, modern dances, including the "turkey trot," "tango" and "bunny hug," will be urged on the National Federation of Women's clubs. Dr. E. C. Folkmar, chairman of the hygiene committee of the local branch, issued a call today for a meeting next Thursday to canvass the situation.

AUTO ACCIDENT FATAL

CINCINNATI, Ohio, Oct. 10.—Miss Bright Kelly, 22 years old, a society girl of Covington, Ky., was killed and two other young women and three men were slightly injured early today when the automobile in which they were riding turned turtle on the Indian Hill road near Madisonville.

Velvet Stage for Telephone Company After a Long Wait

The Nevada Telephone-Telegraph company is sending out checks for dividend No. 4 and extra dividend No. 5, after having used the earnings and capital of the company for a period of almost ten years to give the people of southern Nevada a service that is the equal of any in the country.

Recently the business at Tonopah has called for considerable extension by the addition of new cables, that have kept a score of men busy reeling poles and stringing wires, erecting poles and extending leads.

Accompanying the checks is the annual report, which throws some light on the operations of the company since its inception, as the report furnishes a complete review of development and progress under the direction of F. G. Waterhouse, general manager. Some interesting features are included in the report. The fact that there ever was a line to Greenwater has probably escaped the memory of the oldest inhabitant, but the telephone company will not forget this unfortunate investment, as it represents a net loss of \$33,382.97.

Fans Fight to Gain Advantage In the Long Dreary Night Wait

PHILADELPHIA, Oct. 10.—A number of fights occurred in front of Shibe park this morning when the night police detail was shifted for the day squad. The police lost control of the crowd waiting for tickets and the stronger men pulled the weaker out of line, while boxes and boards were thrown in every direction.

A full detail of police restored order. Residents of the neighborhood complained that the fans stole bread, milk and newspapers from their doorsteps.

WILD CAT ALTMAN AND LYDON TO MIX IN GOLDFIELD TUESDAY

The pugilistic program presented by Promotor Morgan Williams leaves one with the impression that he's going to see a good evening's entertainment at Goldfield Tuesday night, October 14th.

The card as arranged by "Morg" is a very liberal one, comprising in all four contests. There will be two four-round preliminaries, one between lightweights and one between welterweights, a six-round go between heavyweights and the lightweight special.

"Wildcat" Altman of San Francisco and "Freck" Lydon of Tonopah are billed to supply the main event in a ten-round go, and a hot contest is being looked forward to by the fans. Both are mixers and are always aggressive, so the fans can expect a sizzling bout. The "Wildcat" has done some splendid work in the past and usually gives his opponent a tough time; in fact, he is looked on as one of the best lightweights of the coast.

Lydon has been showing marked improvement in his work lately, and he really expects to stop Altman, although a favorite. The Tonopah youth is in great shape, having worked hard for the bout, and a number of his Tonopah admirers will back their favorite.

The preliminaries should be productive of some fast glove work. Johnnie Morrison, who always gives the fans a good run for their money, meets Kid Newell, the Reno Boy, who has lately been doing some good milling in the northern towns. Little Jack, however, is in fine fettle, due to his ball playing the past summer, and has a right arm wallop which he says will bring home the bacon if he is able to land it in the right spot.

The bout between Al Zellner and Sailor Red, welterweights, promises to be a sizzler for action. Both are of the slugging variety, and while "Red" has considerable speed and cleverness, Zellner is the more rugged of the two, and is capable of assimilating quite a bit of punishment without flinching.

The six-round go between the two heavyweights, Frank Darrah and Al Bowers, both of Tonopah, is expected to be an event of more than usual interest. Darrah, who has shown himself to be very much of an athlete while playing with the Tonopah ball team, and who is known as the "String Man," has been quite anxious to meet Bowers, the Indian, in the squared circle, and as considerable rivalry exists between them, some fast and hard work can be looked for.

AUTO JURY DISAGREES.

LOS ANGELES, Oct. 10.—A second jury disagreement was entered today in the case of Ralph Sterling Ferris, a wealthy young man of Rawlins, Wyo., who has been tried twice for the death of Michel Klesorek, a 7-year-old boy, run down by Ferris' automobile. The jury was out five and a half hours. In a civil suit recently the father of Ferris' victim obtained a \$10,000 verdict.

BENDER THE CHEROKEE WINS AGAIN FROM CRIPPLED GIANTS

BATTERIES Philadelphia: Bender and Schaefer, New

BATTERIES—Philadelphia, Bender and Schang. New York, Demaree, Marquard and McLean, Wilson.

SHOEBO, PARK, PHILADELPHIA, Oct. 10.—Bender won his second game in the world's series, defeating the Giants by a score of 6 to 5. He held them runless for six innings, while his teammates made one run in the second inning, three in the fourth and two in the fifth.

Singles by Burns and Murray and a home run in the seventh gave New York three, and two in the eighth.

Demaree was knocked out at the end of the fourth, when he allowed four runs and seven hits and walked one.

Marquard struck out Baker and then allowed two runs in the fifth. Bender struck out five. He held the Giants to two hits in the first six innings.

The Athletics' defense was perfect. A circus catch by Oldring cut off a run for New York. Snodgrass was forced to retire from third base by lameness, Herzog relieving him.

The batteries: New York, Demaree, Marquard, McLean and Wilson; Philadelphia, Bender and Schang.

MEXICAN TROOPS DESERT RANKS IN FACE OF ENEMY

COWARDLY CONDUCT OF RELIEF COLUMN SENT AGAINST TORREON.

(By Associated Press.)
MEXICO CITY, Oct. 10.—Failure of General Aubert to reach Torreon in time to relieve the garrison is explained by the fact that most of his troops deserted before half the journey was completed. He started nearly a month ago from Saltillo and was 25 miles east of Torreon when news of the constitutionalist victory reached him. Soon the vanguard of fleeing federalists was sighted and Aubert's men fled.

It is also asserted that General Alvarez's federalists fled as soon as the first shot was fired when they were ambushed, 30 miles from Torreon. Another story is that the army made a fierce resistance but the troops were overpowered and executed.

CHEAP ELECTRICAL SUPPLIES IN WEST

GOVERNMENT WILL FURNISH APPLIANCES TO SETTLERS AT COST.

(By Associated Press.)
WASHINGTON, Oct. 10.—The interior department issued an order today authorizing the sale by the government of electrical supplies and energy transmission material to settlers on public lands desirous of obtaining electricity from government power plants. This order is expected to be of great assistance in the development of reclamation projects in the west.

The event of the season—the Musicians' masquerade ball Friday night.

FEDERAL COURT RESTRAINS THE NEW RATE LAW

THREE-CENT RATE HUNG UP TO DETERMINE POWERS OF STATE BOARD.

An order made by Judge Farrington at Carson City puts in force a temporary restraining order preventing the railroad commission from putting into effect its order establishing a 3-cent passenger rate on main and branch lines of the Southern Pacific company in Nevada. The order was made as a result of arguments in the federal court some time ago, when the railroad's application for a temporary injunction came up for hearing.

The restraining order will remain in force until the matter is heard on its merits before Judge Farrington, when the court will decide whether the commission had the right to make such an order and whether or not the 3-cent rate, as it applies to branch lines, is confiscatory. In case the contention of the railroad is upheld a permanent injunction will issue and, as the order reducing main line rates from 4 to 3 cents and branch lines from 5 to 3 cents is a joint one, the old rate will still apply, as at present.

The order establishing lower rates was not made unanimously. Chairman Bartine wrote a dissenting opinion, in which he denounced the order in strong terms.

CHECKING REPORTS TO THE INDUSTRIAL COMMISSION

W. R. McFadden, formerly of Tonopah, but now employed by the State Industrial commission as auditor, left this morning for Goldfield, where he will continue the examination of accounts of concerns that have subscribed to the liability law for the compensation of employees.

SPECULATORS ARE PROBED.

NEW YORK, Oct. 10.—John B. Foster, secretary of the New York National league baseball club, was to appear before the grand jury today to tell what, if anything, he knows about the operations in world's series tickets.

PROSPECTING NORTH STAR TO PICK UP ORE

EXPLORING THE 1250 LEVEL AND TRYING OUT THE UPPER LEVELS.

On the North Star Manager Chandler is increasing his force as fast as the development warrants, and now has 18 men employed. Next week he will put a third shift in the shaft. Now he is going after the vein from the 1250, where no work was done since the days of the Brady management. This will be northeast and southwest of the shaft. He has completed timbering the winze and has started the hoist sinking. He is also raising up in the old stope above the 1050, where the ore has been of low grade, to see if he can bring in the values again between the top of the stope and the 950 level.

The large attendance at the Cobweb saloon to hear the reports from the ball games shows how good service is appreciated.—Adv.
